

Projects Completed:

- Replacement of a deteriorated, wood shingle roof.
- Major brickwork repair and repointing.
- Epoxy stabilization and reinstallation of original jack arches and sills.
- Plaster panel restoration.
- New electrical service.
- Reconstruction of the front and rear platforms.
- Replacement of 25-30 year old boilers.
- Heat Loss/Gain Survey for Geothermal Research.
- Design and Tests for Geothermal Heating/Cooling System.
- Full paint removal and repainting of the exterior architectural woodwork, using a paint color achieved through microscopic analysis.
- Historic Structure's Report and Architectural Record Drawings of mansion.
- Elizabeth U. Teackle Letter Transcription Project, Phase I.
- Archaeological investigation of the grounds, which produced a wealth of cultural information.
- Ground-penetrating, radar survey in anticipation of a geothermal heating/cooling system.
- Purchase of the Sarah Martin Done house property located behind the mansion, planned as part of the future Somerset Heritage Center.
- Roof replacement and repainting program for the Sarah Martin Done house.
- Implementation of Educational Programming with Somerset County School system.
- Salute to Somerset Endowment Fund-raiser in 2008
- Implementation of Geothermal-based climate control system
- Professional paint analysis of the interior
- Installation of built in "dresser" in the mansion kitchen, which showcases the collection of brass, iron, pewter, and earthenware accessories
- Installation of restored baseboards throughout the house
- Repointing of brick work in the north wing and exterior of the south wing
